#### Where We Were?

Costs climbed from

- Subjective permanent disability
- No control over medical treatment
  - PTP presumption of correctness
  - Multiple surgeries
  - Over utilization

- Fee schedule issues
  - Pharmacy
  - Outpatient surgeries
- SIP audit issues

#### **Legislative and Regulatory Changes**

### **AB 749**

# AB 227/SB 228

**SB 899** 

# **SIP Regulations**

- Increase in Benefit Rates
- Repeal of Primary Treating Physician Presumption of Correctness for Injuries after 1/1/03
- Settlement of Vocational Rehabilitation
- Medical Confidentiality

#### AB 227/SB 228

- Repeal of primary treating physician presumption of correctness for all injuries
- Fee schedules
- Treatment caps
- Utilization review
- Supplemental job displacement voucher

#### **SB 899**

- Medical provider network
- Treatment caps
  - Extended to occupational therapy
- QME process
- Immediate medical payment
- Temporary disability cap
- Permanent disability
- Apportionment
- Return to work

#### **SIP Regulations**

- 3-year rule codified
- Utilization review
- Fee schedules
- Dueling medical reports
- Present value
- Apportionment

## **Current Issues**

- Repackaged medication
- Medical/doctor spend
- Compound medication
- Food supplements
- Sleep disorders
- Sexual dysfunction
- Bill review and UR integration
- Multiple QME reports

- Repeal of predesignation of personal physician
- Repeal of vocational rehabilitation
- Two-year temporary disability cap

# **MPN Challenges/Considerations**

- Industry results
- Implementation/notice issues
- Variety
- Size
- Reimbursement structure
- Utilization review approach
- Integration with bill review vendors

# Utilization Review Challenges/Considerations

- Supreme Court decision Sandhagen
- Audits/penalties
- Cost

- 4.7% in 2002 vs. 11% in 2007 (6 months post injury)
- 5% in 2002 vs. 10% in 2007 (12 months post injury)
- Effectiveness
- Integration with bill review vendors

# Permanent Disability Challenges/Considerations

- AMA Guidelines
  - PD costs reduced by 60% due to new PDRS
  - Understanding the Guidelines
  - Obtaining ratable medical reports
- Apportionment
  - Costs reduced by 6% due to apportionment
- Return to work
  - Costs reduced by 2% due to RTW
- Old schedule versus new Permanent Disability Rating Schedule?
- Future earning capacity variant

#### What's on the Horizon?

#### Permanent Disability

- Revised FEC for body parts
- Medical Treatment Utilization Review Schedule
  - Elbow (ACOEM)
  - Chronic Pain (ODG)
  - Post surgery (ODG)
  - Low back
  - Stress/Post Traumatic
    Stress Disorder

- Fee schedule revision
  - Study being done by Lewin Group
  - Currently using 1997 CPT codes
  - Adopt Medicare's relative value units not the entire Medicare system
- Return to work
- Upcoming regulations
  - Permanent disability
  - Medical provider network

# Permanent Disability Rating Schedule Changes

- Effective July 1, 2009
- Division of Workers' Compensation estimates new PDRS will increase permanent disability by an average of 16%
- FEC adjusted to reflect data on wages lost by the workers with specific injury type

- Change age adjustment factors
  - Before: (below 37 = no increase) (over 41 = increase)
  - New: Provide only increase for those under 21 and over 52

# Litigation

- Spike
- Reasons
- Issues
  - Permanent Disability
  - Apportionment
  - Qualified Medical Examiners
  - Medical Provider Network
  - Utilization Review

# **CWCI Trends – '05-'06**

#### **Costs up in every medical fee section** 93.2% Medical expense Eval & management 22% Surgery 21.6% Radiology 27.2% Physical medicine 28.4% Specialty service 57.2% Chiro (after cap) 13.3%
