What's Happening In The Market?

Among the highlights in the commercial auto and trucking market cited by those placing such risks:

- **BUYERS' MARKET**—with prices falling for most risks despite the countervailing trends noted below.
- **LOOKING AHEAD**—with carriers increasingly using predictive modeling to more aggressively price better risks.
- **TAKING NEXT EXIT**—with a number of carriers getting out of a line of business that they could not write profitably.
- **BETTER SAFE THAN SORRY**—with carriers more proactive in loss prevention and mitigation to help truckers become more safety conscious.
- **MARKET PURGE**—with a considerable drop over the past five years in the 100-plus carriers that used to write truck insurance.

Key Players

The Hartford model uses traditional factors such as motor-vehicle records, prior loss history and the company's financial standing.

"Although many of these characteristics were used in underwriting in the past, multivariate analysis allows us to apply pricing in a more systematic and consistent way," he said.
