

### Loss Reserve Ranges in Practice

CAS Spring Meeting June 19, 2007

Thomas M. Mount, ACAS, MAAA A.M.Best Company

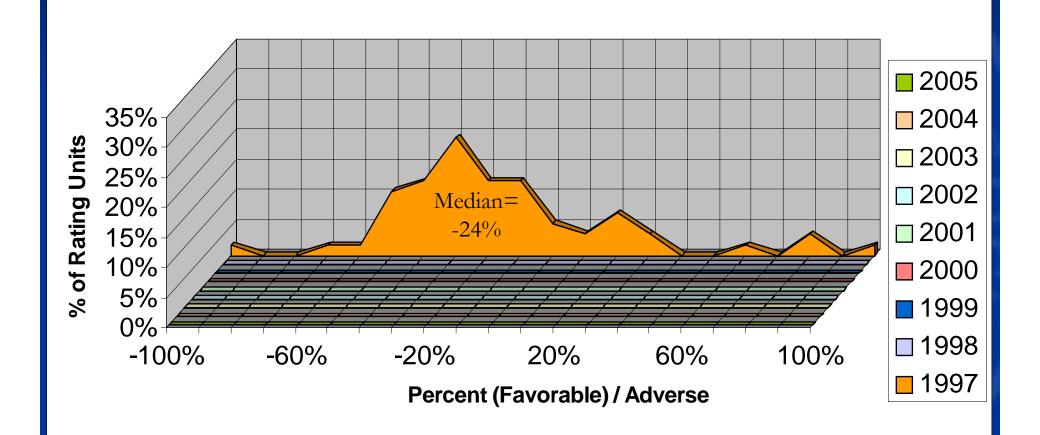

#### Outline

- Historical Volatility Schedule P
- Reserve Capital Factors
- Deficiency Factors
- Ranges & Reserve Reviews
- Ranges & Statement of Actuarial Opinion
- Ranges & Actuarial Opinion Summary
- Example Company

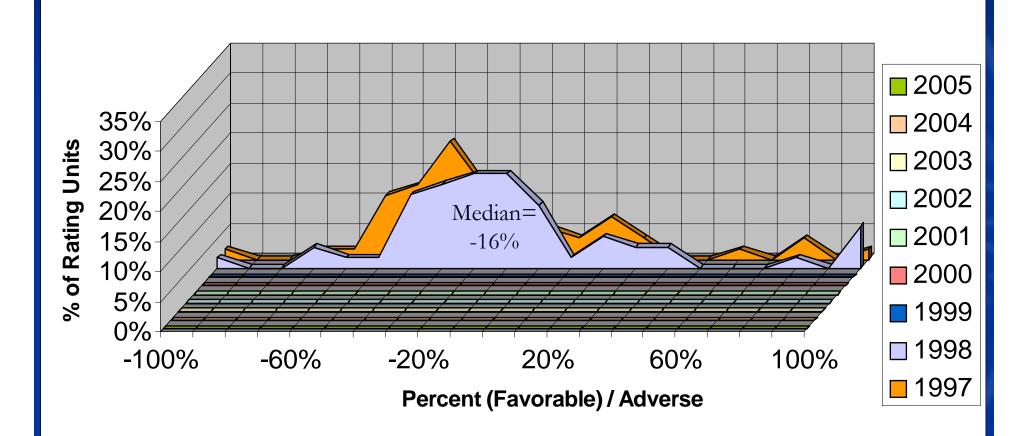

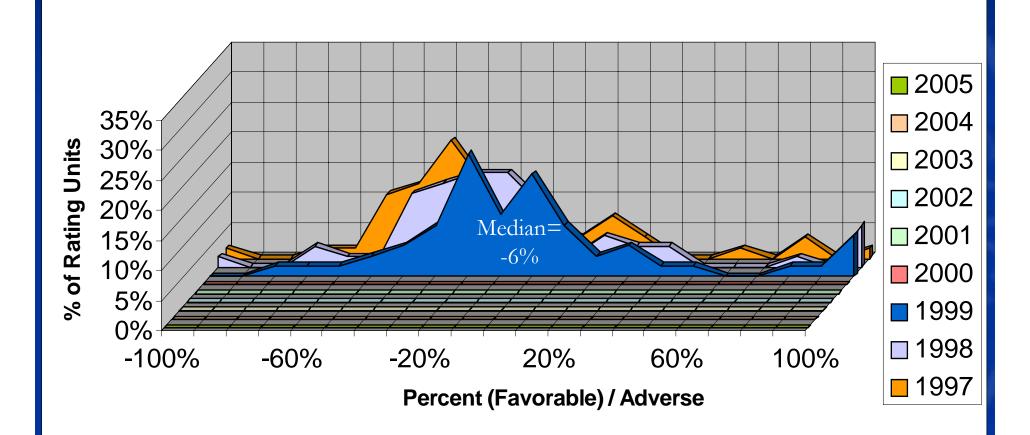

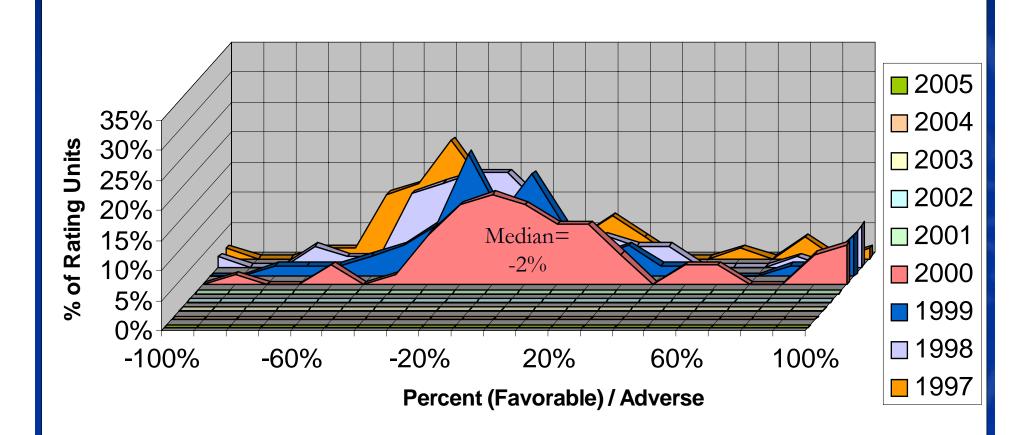

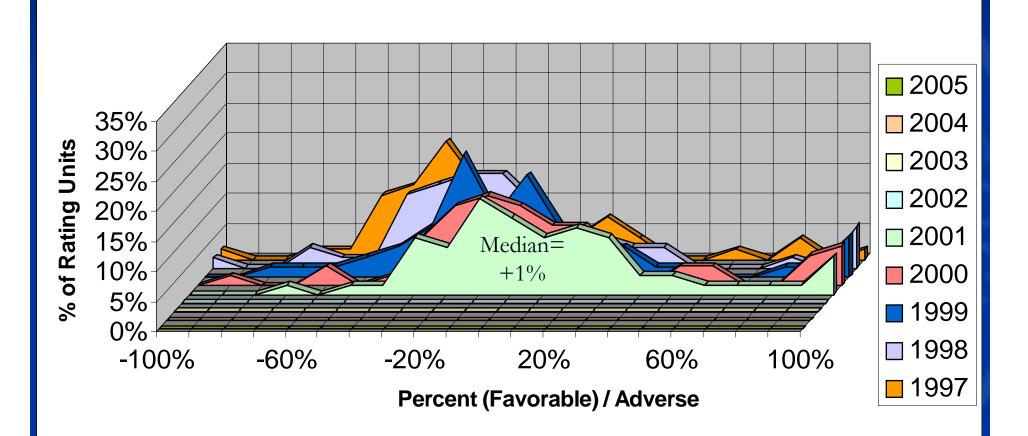

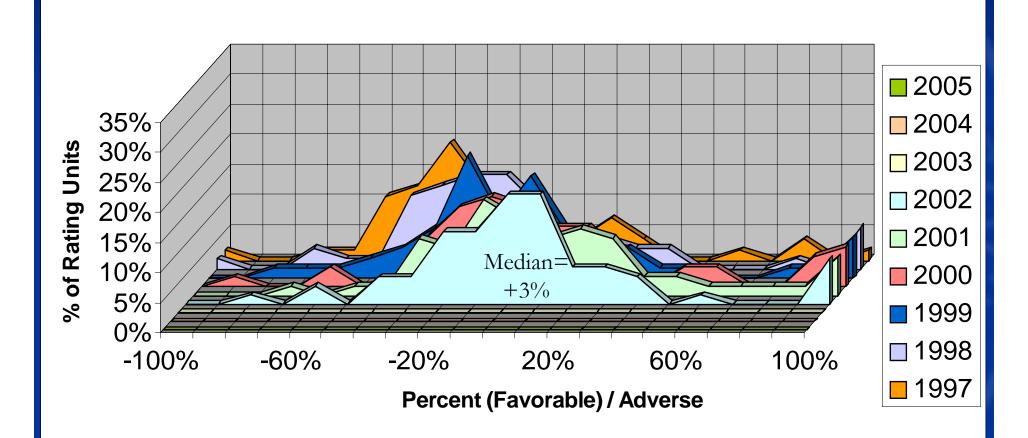

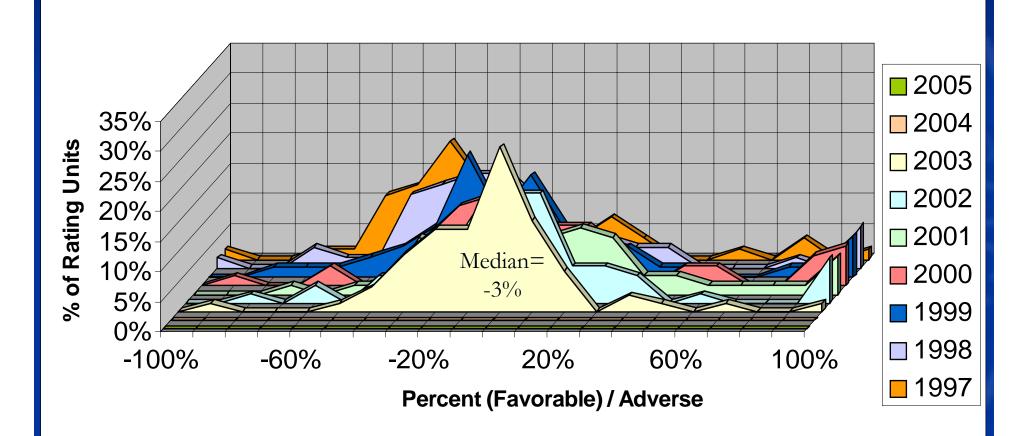

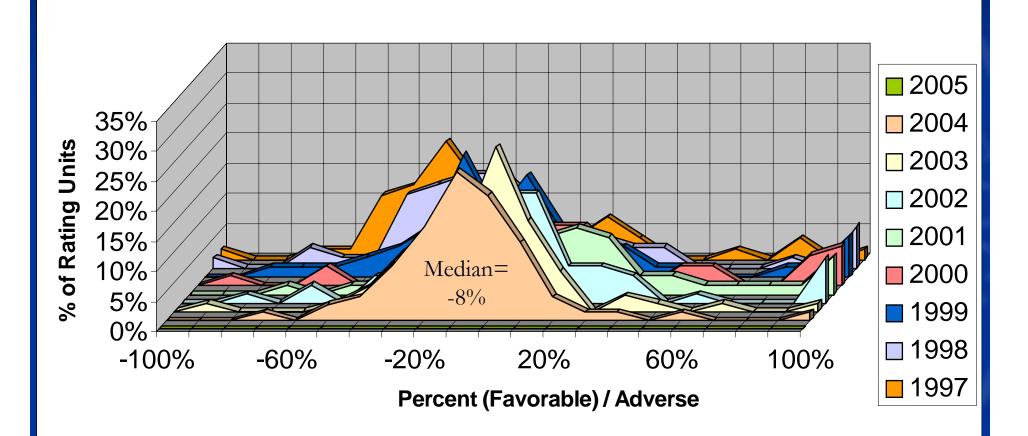

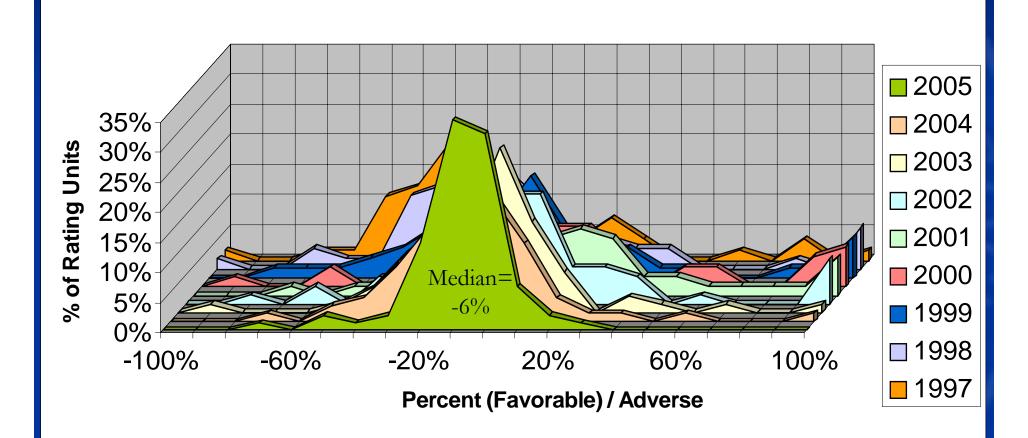

# Med Mal (CM) Industry Reserve Development Thru 12/31/06

(Favorable) /

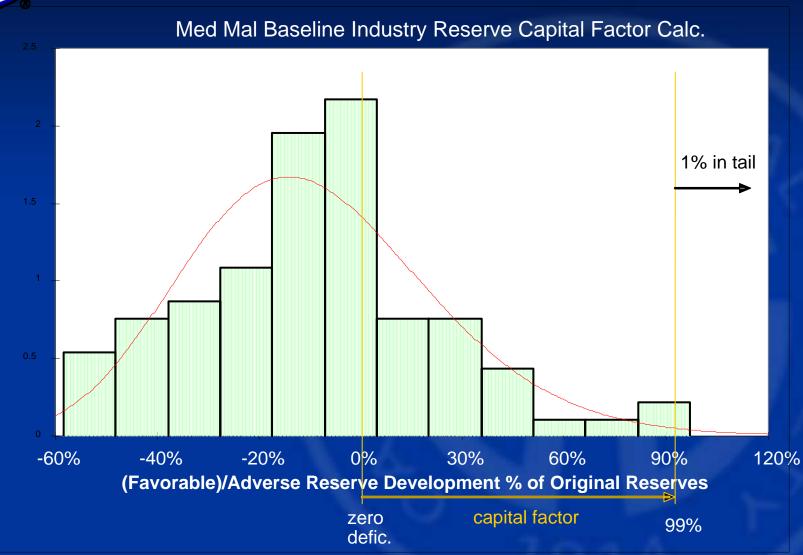

|        | (i avoiable) / |
|--------|----------------|
| CY End | <u>Adverse</u> |
| 1997   | (9.9%)         |
| 1998   | 1.7%           |
| 1999   | 10.5%          |
| 2000   | 19.2%          |
| 2001   | 16.3%          |
| 2002   | 12.3%          |
| 2003   | (3.6%)         |
| 2004   | (6.6%)         |
| 2005   | (6.1%)         |

#### Reserve Risk

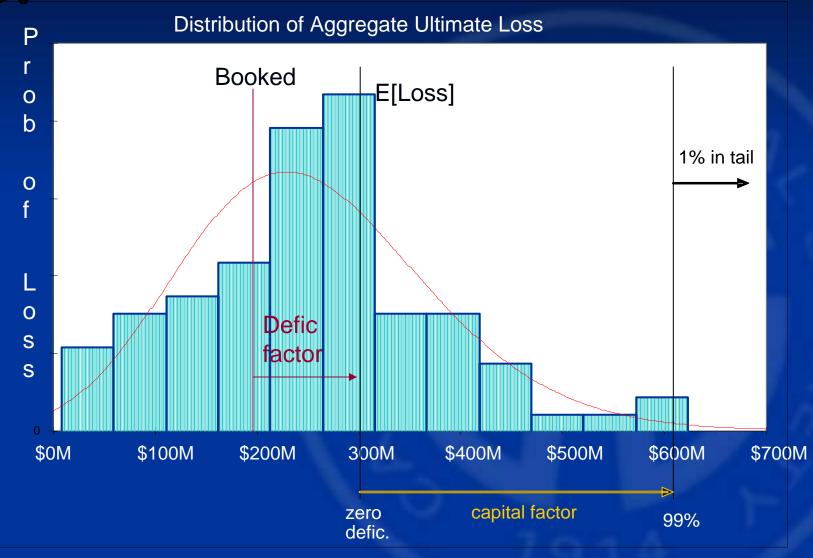

### Reserve Risk The Overlap Fallacy

#### **ASOP 36**

Statements of Actuarial Opinion regarding P/C Loss & LAE Reserves

- The actuary may determine a range of reasonable reserve estimates that reflects the uncertainties associated with analyzing the reserves
- A Range of reasonable estimates is a range of estimates that could be produced by appropriate actuarial methods or alternative sets of assumptions the actuary judges to be reasonable

#### Reserve Reviews

- Review Analysis for:
  - LDF selections
  - **ELR assumptions**
  - Frequency/Severity Trend assumptions
  - Methods used to generate indicated ults
  - Selection of ultimates <u>within range</u> of Indicated ultimates
- AMBest will often make its own reasonable assumptions and see where carried reserves fall relative to these new indications

#### **Indicated Ultimates**

#### Reserve Reviews

- Selection of ultimates within range generates deficiency
- Selection of ultimates within range reflects management reserving philosophy
- Indicated ultimates give insight into reserve range & potential volatility

#### **Actuarial Opinion**

- The Appointed Actuary must provide specific Relevant Comment paragraphs to address the Risk of Material Adverse Deviation (RMAD)
  - Explicitly state whether the actuary <u>reasonably</u> believes there are significant risks and uncertainties that could result in material adverse deviation
  - Materiality Standard
  - Basis for establishing the materiality standard
  - If RMAD exists, describe major factors/conditions underlying the risks that could result in MAD

### Actuarial Opinion Summary

- December 2006 Property Casualty Practice Note on Statements of Actuarial Opinion says the Actuarial Opinion Summary (AOS) should include the following (Gross & Net):
- A) Appointed Actuary's Range of Reasonable estimates, and or
- B) Appointed Actuary's point estimates, and
- C) Company's recorded reserves, and
- D) Difference between recorded & point and /or difference between recorded and range, and
- E) If 1-yr adverse devel > 5% in 3 out of last 5 CYs, as measured in sched P Part 2, explicit description of reserve elements and management decisions that were major contributors

- Actuarial Reserve Review states
  - Reasonable Range is -5% to +5%
- Actuarial Opinion states
  - Reserves make for a reasonable provision
  - Contingent on future events, actual may vary significantly from expected, no provision for extraordinary events
  - Risk of Material Adverse Deviation exists
    - Standard is 10% of reserves
    - Issues are growth, case reserve strengthening, new claims handling philosophy
- Actuarial Opinion Summary states
  - Point estimate only

- Actuary States
  - My Reserves are adequate!
  - Your capital factor is too high!

#### Summary

- Reserve Volatility drives Required Capital
- Companies need to understand potential volatility based on other reasonable assumptions
- Need to embrace volatility
- Need to quantify volatility
- Need to report consistently on that volatility
