

Consumer Credit Trends

Key Learnings and Conclusions

1

- Ray Towler
- Convicted of rape in 1981
- Served 29 years in prison
- Released from Jail in 2010 as the result of DNA Evidence

2

AGENDA

- * Do we see a shift in credit score changes?
- * Credit Models 101
- * Credit Trends
- * Credit Model Performance
- * How are Credit Models Currently Regulated

3

National Insurance Score Trends

- ▶ Higher scores indicate better risks
- ▶ Credit scores naturally shift over time
- ▶ Average scores shifted -1.0% and 1.0% annually between 2004 and 2007

4

National Insurance Score Trends

- ▶ The average Attract Home Score was flat from 2007 to 2009
- ▶ The average Attract Auto Score actually rose between 2007 and 2009

5

Credit Models 101

* Insurance Models ≠ Financial Models

- | | |
|--|--|
| ▶ Insurance Models are developed on historical insurance losses | ▶ Financial Models are developed on bad debt/delinquencies |
| ▶ Insurance Scores rank order loss propensity | ▶ Financial Scores rank order credit "bads" |
| ▶ Insurance Scores are not dependent on derogatory credit behavior | ▶ Financial scores are very dependent on derogatory credit behavior → financial scores declining |

5

Credit Models 101

* Insurance Models use a mixture of attributes to rank order loss propensity:

- ▶ Credit Seeking Behavior – inquiries
- ▶ Account Age – length of time account is open
- ▶ Credit Utilization – ratio of balance to limit
- ▶ Payment Behavior – delinquencies
- ▶ Derogatory Public Records - # of bankruptcies/foreclosures

7

National Insurance Score Trends

▶ Higher Index = lower score = higher risk = higher premiums

▶ Derogatory Public Records have trended up since Q4 2008

▶ Avg Debt Burden and 30 Day Delinquencies have not seen significant change from 2007 to 2009

8

National Insurance Score Trends

► Average Account Age

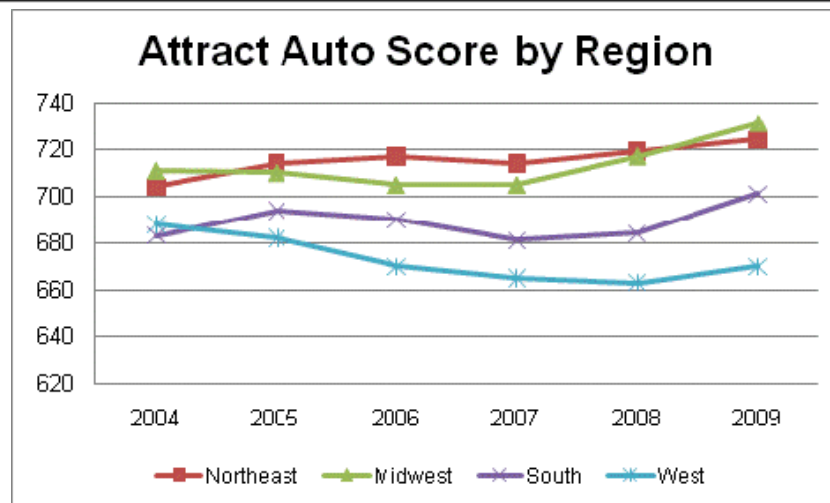

- Higher Index = Higher scores = lower risk = lower premiums
- Average Age is increasing from 2007 to 2009 due to credit tightening

► Average Inquiries

- Lower Index = Higher scores = lower risk = lower premiums
- Average inquiries are significantly decreasing from 2007 to 2009 due to credit tightening

9

Regional Insurance Score Trends

- All Regions see gradual score improvements from 2007 to 2009

10

Consumer Segment Credit Trends

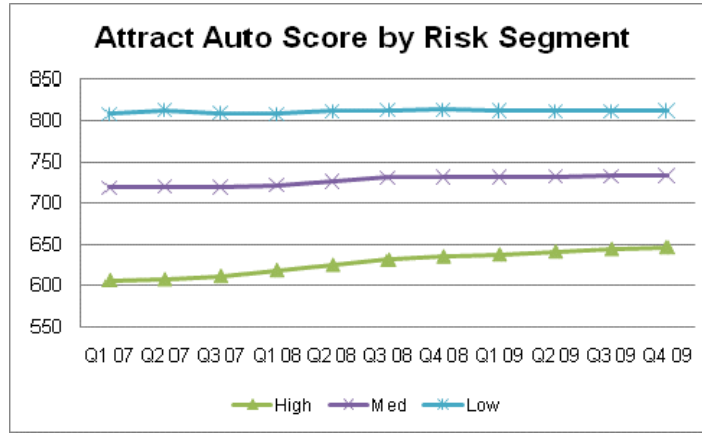

- ▶ 810K consumers tracked between Q1 2005 and Q4 2009
 - ▶ National sample of existing policies
- ▶ Quarterly credit snapshots (2005-2009)
- ▶ Focus on past 2 years of credit migration
 - ▶ Tracked from Q1 2007 to Q4 2009
- ▶ Consumers grouped into our three Attract 3.0 model segments
 - ▶ High Risk – Historical derogatory/delinquency
 - ▶ Medium Risk – Less established credit
 - ▶ Low Risk – Established credit

Consumer Segment Credit Trends

High Risk (34%)	Medium Risk (29%)	Low Risk (37%)
<ul style="list-style-type: none"> • Active Credit Seekers 2.4 inquiries past 6 mos. 	<ul style="list-style-type: none"> • Mild Credit Seekers 1.5 inquiries past 6 mos. 	<ul style="list-style-type: none"> • Low Credit Seekers .56 inquiries past 6 mos.
<ul style="list-style-type: none"> • Credit Depth 6 years on file 18 trades 	<ul style="list-style-type: none"> • Credit Depth 5.4 years on file 21 trades 	<ul style="list-style-type: none"> • Credit Depth 11.5 years on file 18 trades
<ul style="list-style-type: none"> • Credit Utilization 60% Avg Debt Burden Total balances ~\$20k 	<ul style="list-style-type: none"> • Credit Utilization 40% Avg Debt Burden Total balances ~\$25k 	<ul style="list-style-type: none"> • Credit Utilization 20% Avg Debt Burden Total balances ~\$13k
<ul style="list-style-type: none"> • Payment Behavior/Derogs 35% delinquent balances 87% public derogatory items 71% historical collections 22% historical bankruptcy 	<ul style="list-style-type: none"> • Payment Behavior/Derogs .8% delinquent balances 0% public derogatory items 0% historical collections 0.1% historical bankruptcy 	<ul style="list-style-type: none"> • Payment Behavior/Derogs .7% delinquent balances 0% public derogatory items 0% historical collections .1% historical bankruptcy
<ul style="list-style-type: none"> • Insurance Risk 1.31 loss ratio relativity 	<ul style="list-style-type: none"> • Insurance Risk .98 loss ratio relativity 	<ul style="list-style-type: none"> • Insurance Risk .73 loss ratio relativity

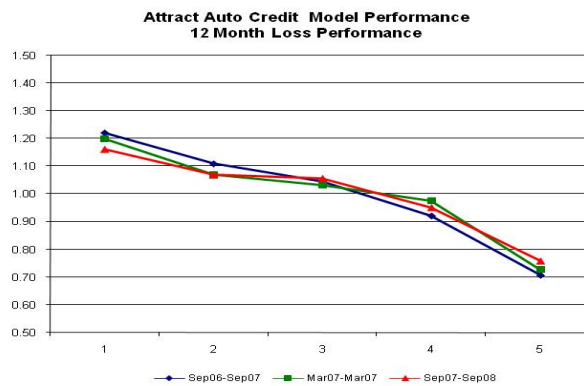

Consumer Segment Credit Trends

- ▶ All Segments are trending consistently
- ▶ Low risk segment most stable over time
- ▶ High risk segment has improved the most

13

Insurance Model Impact

- ▶ Insurance scores continue to rank order loss propensity

14

How Are Credit Models Currently Regulated

* **Federal**

- ▶ Fair Credit Reporting Act (FCRA)

* **State**

- ▶ FCRA “Like” State Regulations and Laws
- ▶ Models Require Commissioner approval
- ▶ Models are filed. Attract is publically Filed

15

Summary

* **Insurance Credit Based Scores are actually *improving* in some segments and *stable* in others due to Impact from the Economy**

- ▶ The current economic crisis is mainly having a positive impact on consumer insurance scores
 - ▶ Increase in extraordinary life events, but still relatively low percent
 - Job loses, increased foreclosures and bankruptcies
 - Increase in mortgage delinquency
 - ▶ Consumers have reacted by saving more and paying down debt
 - Decreased inquiries, new trade lines and overall balances
 - Insurance scores (Attract) are not solely dependent on derogatory events
 - ▶ Without credit scoring
 - Reduced risk measures
 - Forces carriers to loosen their underwriting standards
 - Run the very real risk of not properly pricing their products
 - The end result is deficient capital for paying claims.
